| <b>Total Cannabinoids</b> |         | 99.10    | 991   |                                                                                                                                   |

Total THC = delta 9-THC + (THCA \* 0.877)

Total CBD = CBD + (CBDA \* 0.877)

Total CBG = CBG + (CBGA \* 0.878)

LOQ=Limit of Quantification, the lowest measurable concentration of an analyte.

THCA, delta 9-THC, delta 8-THC, CBDA and CBD are accredited by TNI 2016 and ISO 17025

**ISO 17025

### Notes and Definitions

Regulatory Compliance samples were collected onsite at facility according to SOP-402 and SOP-403 and following Sampling Plan FN117. Quality Control samples were tested as received.  
Results do not include uncertainty of measurements. Available upon request.

|     |                                                                                                           |
|-----|-----------------------------------------------------------------------------------------------------------|
| ATM | Non-cannabis matrix related interference or suppression of Internal standard                              |
| BLI | Baseline Interference - Cannabinoid peak interference in chromatographic baseline affecting QC recovery . |
| BLK | Analyte detected in method blank, but not associated samples.                                             |
| BSH | Blank Spike High - Blank Spike recovery above method limit. no detections in samples.                     |
| BSL | Blank Spike Low - Blank Spike recovery below lower method limit, analyte chromatography reviewed          |
| C   | manually for all samples.                                                                                 |
| CBD | Interference due to co-elution                                                                            |
| CV1 | CBD matrix interference on GC Pest chromatography                                                         |
| CV2 | CCV was above acceptance criteria, Non-detect samples are considered acceptable.                          |
| INF | CCV was below acceptance criteria, sample still exceeds regulatory limit.                                 |
| ISH | One or more QC falls outside acceptance criteria. Data entered into LIMS for informational purposes only. |
| ISL | Internal Standard concentration is above acceptance criteria.                                             |
| MSH | Internal Standard concentration is below acceptance criteria.                                             |
| MSI | Matrix Spike High - Matrix Spike recovery above method limits.                                            |
| MSL | Matrix Spike Interference - Matrix spike source sample contains analyte hit above calibration affecting   |
| TPP | recovery accuracy in Matrix Spike.                                                                        |
| U   | Matrix Spike Low - Matrix Spike recovery below lower method limit, analyte chromatography reviewed        |
|     | manually for all samples.                                                                                 |
|     | Internal Standard concentration outside control limit due to matrix interference                          |
